EXAMINER

WEST, LEWIS G

ART UNIT	PAPER NUMBER
----------	--------------

2682

DATE MAILED: 02/06/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/813,481	<b>Applicant(s)</b> STUDY ET AL.	
	<b>Examiner</b> Lewis G. West	<b>Art Unit</b> 2682	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 09 January 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 2-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 2-9 is/are allowed.
- 6) ☒ Claim(s) 10 and 13-18 is/are rejected.
- 7) ☒ Claim(s) 11 and 12 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 30 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
     Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
     Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

***Response to Arguments***

Applicant's arguments filed January 9, 2006 have been fully considered but they are not persuasive. SIMON OWNER'S MANUAL clearly shows (see the cited area, and in addition the picture of multiple radio connected devices on claim 4), multiple sources which are differentiated as well as different audible outputs for each (the name and/or number of the sensor is output audibly). Therefore the arguments are not persuasive and this action is made final, thereby closing prosecution.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 13, 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by the SIMON OWNER'S MANUAL.

Regarding claim 10, the SIMON OWNER'S MANUAL discloses a device comprising: receiver means for receiving wireless communications (see page 4); audio transducer means for providing a plurality of audible signals (see alarm sirens page 6); control means (panel, page 4) operably coupled to the receiver means for: receiving wireless communications; responding to at least some of the wireless communications with a corresponding control action (such as communicating with a central monitoring station, sounding a siren, etc see page 4); diagnostic means operably coupled to the receiver means and the audio transducer means for: ascertaining

Art Unit: 2682

information regarding a source of a given wireless communication (panel identifies from which sensors information is being received, see sensor open condition page 14); and causing provision of at least one audible signal to uniquely characterize information regarding a source of a given wireless communication independent of any control action as may also be included with the given wireless communication (in sensor open condition, the panel voices a different name for each sensor, see page 14).

Regarding claim 13, see the rejection of the parent claim concerning the subject matter this claim depends upon. The SIMON OWNER'S MANUAL further discloses that the information regarding a source of a given wireless communication includes information that corresponds to a type of transmitter identifier that the wireless communication includes (either alarm types, see page 6 or System trouble beeps, see page 14).

Regarding claim 17, see the rejection of the parent claim concerning the subject matter this claim depends upon. The SIMON OWNER'S MANUAL further discloses mute means for selectively muting audible signals as correspond to at least some characterizing information regarding the source of a given wireless communication (disabling panel voice messages or panel beeps or disarming alarm siren, see pages 5-7).

Regarding claim 18, see the rejection of the parent claim concerning the subject matter this claim depends upon. The SIMON OWNER'S MANUAL further discloses that the mute means do not mute any audible signals as correspond to control actions that are sourced by the control means (disabling panel voice messages and/or panel beeps but not disarming alarm siren, see pages 5-7).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over SIMON OWNER'S MANUAL in view of TSUI (US 6,243,000 B1).

Regarding claim 14, see the rejection of the parent claim concerning the subject matter this claim depends upon. However, the SIMON OWNER'S MANUAL does not disclose that the type of transmitter identifier includes at least fixed code identifiers. TSUI discloses that the type of transmitter identifier includes at least fixed code identifiers (column 5 lines 42-58 and column 6 lines 14-25). Therefore it would have been obvious to a person of ordinary skill in the art at the time the invention was made for the type of transmitter identifier to include at least fixed code identifiers. Use of a fixed code enhances reliability of the rolling code by indicating to the system that the rolling code of the sensor and panel are out of sync with each other.

Regarding claim 15, see the rejection of the parent claim concerning the subject matter this claim depends upon. However, the SIMON OWNER'S MANUAL does not disclose that the type of transmitter identifier includes at least rolling code identifiers. TSUI discloses that the type of transmitter identifier includes at least rolling code identifiers (column 5 lines 42-58 and column 6 lines 14-25). Therefore it would have been obvious to a person of ordinary skill in the art at the time the invention was made for the type of transmitter identifier to include at least

Art Unit: 2682

rolling code identifiers. Use of a rolling codes enhances security by preventing a hostile user from detecting the code and using it to disarm the control unit.

Regarding claim 16, see the rejection of the parent claim concerning the subject matter this claim depends upon. However, the SIMON OWNER'S MANUAL does not disclose that the type of transmitter identifier includes at least fixed code identifiers and rolling code identifiers. TSUI discloses that the type of transmitter identifier includes at least fixed code identifiers and rolling code identifiers (column 5 lines 42-58 and column 6 lines 14-25).

Therefore it would have been obvious to a person of ordinary skill in the art at the time the invention was made for the type of transmitter identifier to include at least fixed code identifiers and rolling code identifiers. Use of a rolling codes enhances security by preventing a hostile user from detecting the code and using it to disarm the control unit. Use of a fixed code enhances reliability of the rolling code by indicating to the system that the rolling code of the sensor and panel are out of sync with each other.

***Allowable Subject Matter***

Claims 2-9 are indicated as allowable for the reasons provide in the prior office action.

Claims 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lewis G. West whose telephone number is 571-272-7859. The examiner can normally be reached on Monday-Friday 7:00-3:30.

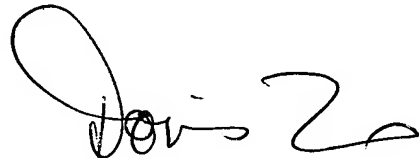

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on 571-272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
